### Abstract of WO 9746006 (A1)

A program schedule guide controller generates a program schedule image containing date and time information, program title information, and category information, only displays the titles of programs to be broadcast on the channel being selected, and enables the user to arbitrarily register displayed category information. The titles of the programs frequently watched by the user are automatically registered and the titles are contained in the category information. Therefore, an electronic program guide (EPG) which is very useful to the user is provided.
